

TECHNICAL DATA SHEET

G-POLY SC

PRODUCT DESCRIPTION

G-POLY SC has essentially zero odor. The ideal applications are hospitals, restaurants, kennels, veterinary facilities, health care facilities, and garages etc. It is a two component, extremely chemical resistant. and non-yellowing aliphatic Polyaspartic. It features high gloss, high build, and a cure time of 4 to 6 hours, and generally return to service in 24 hours. It can be installed in extremely high or low temperatures. G-POLY SC is the ideal product when extremely low odor, durability and UV stable system are required.

APPLICATIONS

Clean Rooms

Pharmaceutica

- Food Prep/Kitchens **Garage Floors**
- Restrooms
- Aisle ways
- Manufacturing plants Basements
- Schools
 - Laboratories
- - Kennels
 - **ADVANTAGES**
- High Gloss (just like glass) & Build Easy mixing ratio (1:1) 4x more abrasion resistant
- thanepoxy Non-yellowing
- Chemical, scratch, abrasion resistant

Ramps

- Solvent FREE
- Cure at temperatures just above Freezing
- Does not support growth of bacteriaor fungus.

PRODUCT DATA

Volumetric Ratio 1 to 1 Solids 85% Coverage varies on type of surface you're coating. Contact Support **Not Required Temperature Thinning** Pot Life 5-10 min. **Working Time on Floor** 20-30 min. **Cure Time** 7 Days 7-10 Days(Return To Service Vehicle) Critical Re-Coat Time NONE must screen (After full cure surface MUST be sanded prior to next coat.) **USDA Food & Beverage** Meets Req.

TYPICAL PROPERTIES

Appearence	Clear Liquid
Total Solids(% by weight)	85
Total Solids (% by volume)	85
Surface Tension, Dynes/cm	40
Viscosity (Brookfield LVF), cps @ 25° C	600
Density (lbs/gallon)	8.32
Specific Gravity	1.0
Flash Point (C Pensky-Martens closed cup)	<70°F
Freeze/Thaw Stability	N/A
Thermal Stability (28 days @ 52° C)	No Effect
Mechanical Stability	Good
VOC (g/l)	0
VOC (by Weight)	0
Tg (C)	66
Tensile Strength, psi	7000
Elongation	8%

G-POLY SC

CONCRETE PREPERATION

Before coating is applied, concrete must be:

- Dry No wet areas
- Clean Contaminants removed
- Profiled Surface must be diamond ground to a CSP (Concrete
- Surface Profile) rating of "2"... Roughly the feel of 100 Grit Sandpaper
- Sound All cracks and spalled areas repaired

Note: Mechanical preparation is the preferred method of preparing concrete for coating application. Shot-blasting, diamond grinding, scarifying and scab-bling are all acceptable methods.

REPAIR CRACKS

Voids, cracks and imperfections will be seen in finished coating if the concrete is not patched correctly. E2U Joint Filler (Crack Repair) and/ or GES - Crack Mender to fill cracks and imperfections. After the materials are cured, diamond grind patch. If another patching materialis used, contact a GLACIER EPOXY SUPPLY for a compatible and approved alternative.

MOISTURE VAPOR EMISSIONS WARNING

All concrete floors without effective moisture vapor barrier are subject to possible moisture vapor transmission that may cause blistering and failure of the coating system. It is the applicator's responsibility to conduct calcium chloride and relative humidity probe testing to determine vapor emissions prior to applying any coating. GLACIER EPOXY SUPPLY can supply moisture remediation products MVB15 (MOISTURE VAPOR BARRIER) that are up to 15 lbs. GLACIER EPOXY SUPPLY, sales agents will not be responsible for coating failures due to undetected moisture vapor emissions.

MIXING

The ratio of G-POLY SC is 1 Part A to 1 Part B by volume. Mix for 1 full minute using a slow-speed drill, scraping the bottom and sides of the mixing container. Mix only that amount which can be spread in 30 minutes.

FILM PROPERTIES

PHYSICAL PERFORMANCE PROPERTIES OF DRY FILM All tests were conducted on 2.0 to 2.5 mil films, and air-dried for 7 days at room temperature

CLEAN UP

G-POLY SC while in an un-reacted state, may be cleaned up with hot water and degreaser. Isopropyl alcohol or acetone may be needed once the resin begins hardening.

SPECIAL NOTE

NOTE: High Humidity will accelerate work time dramatically. Be cautious when applying on High Moisture Days.

WARNING! SLIP AND FALL PRECAUTIONS

OSHA and the American Disabilities Act (ADA) have now set enforceable standards for slipresistance on pedestrian surfaces. The current coefficient of friction required by ADA is .6 on level surfaces and .8 on ramps. GLACIER EPOXY SUPPLY recommends the use of angular slip-resistant aggregate in all coatings or flooring systems that may be exposed to wet, oily or greasy conditions. It is the contractor and end users' responsibility to provide a flooring system that meets current safety standards. GLACIER EPOXY SUPPLY or its sales agents will not be responsible for injury incurred in a slip and fall accident.

Handling Precautions

Use only with adequate ventilation. Appropriate cartridge-type respirator must be used during application in confined areas. Avoid contact with skin. Some individuals may be allergic to epoxy resin. Protective gloves and clothing are recommended.

GLACIER EPOXY SUPPLY products are warranted for one year after date of purchase. Please refer to the Limited Material warranty for additional clarification.
